PROFILE

AI Full-Stack Engineer with nearly 6 years of experience building production web and mobile apps in React, Next.js, TypeScript and Node.js. I build AI products: agentic workflows, RAG pipelines and LLM tooling with LangChain, OpenAI and the Vercel AI SDK. I've taken products from zero to launch on the App Store and Google Play, on AWS with CI/CD.

WORK EXPERIENCE

Emids Technologies

Senior Consultant — Dec 2025 - Present

- Intergrate LLMs into existing system and automate systems to reduce manual effort.
- Built the frontend using React.js, Redux, and TypeScript, creating an intuitive dashboard and chat interface for visualization and AI-driven querying.
- Optimized API calls and data-fetching through caching strategies, reducing redundant requests by ~30% and improving page load times by ~40%.
- Streamlined component rendering to minimize unnecessary re-renders, improving UI responsiveness across the application.

KPMG

AI Fullstack Developer — June 2025 - Oct 2025

- Built an interactive chat-driven knowledge graph interface using Vercel AI SDK, React.js, Redux, Redux-Saga, TypeScript, HTML, and CSS, enabling users to query and visualize document insights with a high-performance frontend.
- Engineered a multi-agent orchestration system that autonomously coordinated flight bookings, calendar scheduling and procurement planning tasks, invoking tools and handing off to humans for approval.

Yalla Hajji

Founding Engineer & Senior Software Developer — April 2024 - May 2025

- Built the SaaS marketplace from scratch and shipped across web, iOS and Android live on App Store and Google Play.
- Scalable multi-tenant backend (Node.js, REST, Redis) with JWT & RBAC auth, plus React & TypeScript dashboards for booking, payments and analytics.
- React Native & Expo mobile apps with full release pipeline, secure payments, AI recommendations, and AWS (EKS) + CI/CD deployments.

WORK EXPERIENCE

Lemnisk Pvt Ltd

Senior Software Developer July 2021 - March 2024

- Maintained and enhanced the Customer Data Platform (CDP) UI using React.js, Redux, Redux-Saga and TypeScript, improving performance and stability.
- Built Node.js automation tools to streamline client onboarding, integrating Redis caching, NoSQL configurations and REST APIs to cut onboarding time.
- Leveraged AWS (S3, Lambda, CloudWatch, API Gateway) and CI/CD pipelines for scalable deployments and backend monitoring.
- Refactored legacy codebases for type safety and modularity, introducing linting, Prettier rules and Jest test coverage.

Software Developer Dec 2020 - June 2021

- Built reusable JavaScript/TypeScript SDKs that integrate with client websites using React.js, Redux and CSS, improving data-collection accuracy and reducing manual setup.
- Worked with cross-functional teams to implement frontend tracking integrations aligned with Node.js analytics and REST API specs.
- Optimized frontend components with React.js, Redux-Saga and TypeScript for speed and scalability across client platforms.
- Contributed to AWS-based CI/CD deployments and Redis/NoSQL stores for real-time analytics; authored technical docs and Jest tests.

SIDE PROJECTS

- **AI Dev Workflow (Jira + Figma to Code):** VS Code-integrated workflow that pulls Jira tickets and Figma specs via their MCPs, then uses an LLM to generate matching code in the editor.
- **HaniGo · Co-founder · hanigo.in:** Hyperlocal food & grocery delivery marketplace with zero platform fee built and shipped across web, iOS and Android, live on the App Store and Google Play.
- **Labbyk · Co-founder · labbyk.in:** SaaS website builder for Umrah & Hajj agencies to launch a professional site in minutes self-serve onboarding, templates and payments.
